Subject Index

Acetamide-electrolyte binary systems, supercooling phenomena in 729
Activation energy, apparent, of nickel(II) morpholine complexes 475
– –, of dehydration of cerium(IV) sulphate hydrates and deuterates 262
– –, – of oxalic acid dihydrate 1118
– –, of dehydrochlorination of PVC 1022
– –, of cobalt(III) oxyhydroxide 479, 496
– –, of crystallization of glasses 739
– –, of dithiocarbamate complexes 1164
– –, of magnesium carbonate 1081
– –, meaningfuls, measurement by thermal methods 775
– –, of oxygen depletion of bismuth molybdates 303
– –, of reaction of triglycidyl isocyanurate with polyamines 1284
– –, of rare earth lawsonates 1395
– –, of solid-state reactions determination from isothermal data 243
– –, – –, errors in determination of 1075
– –, of thermal decomposition of polymers 239
– –, – –, of propellants 1050
– –, – – of scandium(III) benzoates 1305
– –, – – of tris(piperidyldithiocarbamates) 287
– –, of xylene-bis-neopentyl phosphonates 1243
Adsorption of benzene, microcalorimetric and infrared study 733
– heats of benzene–alumina–iron oxide systems 748
– of oxygene, effect on sulfation of nickel oxide 29
Alkyd–allyl moulding compounds, thermal study of 995
Alloys, determination of kinetic parameters of, with DSC 1146
Alumina, adsorption of benzene on 749
Aluminium-ammonium sulfate, scheme for the thermal dissociation 888
– oxide, hydrated, thermal decomposition of 953
– sulphate, thermal studies on preparation of 1083
Amalgams, dental, identification of mercury-containing phases in, by DSC 131
Aminoketones, dialkylated, mixtures with *n*-heptane, calorimetric study 711
Ammonium sulfate–metal oxide mixtures, reaction products 121
Anilinium octamolybdate dihydrate, thermal decomposition 251
– –, thermal decomposition scheme of 589, 1131
Anthracite, TG–DTA–MS studies 147
Anthranilates, thermal decomposition of 1319
Antibiotics, beta-lactams, DTA 1351
Arrhenius equation parameters, comparison of methods of determination 959

Asphalt–polymer systems, DTA, TG study of 1009
2,2'-Azobisisobutyronitrile, DSC 564
Azodicarbonamide, thermal decomposition 77
p-Azoxyanisole, DSC 418

Benzene, adsorption, microcalorimetric and infrared study 745
Benzoyl peroxide, DSC 564
Bibliography 193, 371, 603, 821, 1175
Binary silverchalcogenides, phase diagrams 526
Bismuth molybdates, oxygen depletion and reoxidation of 301
Book review 393, 631, 843
Butylperoxybenzoate, tertiary, study of thermal runaway of 539

Cadmium(II) dithionate, thermal decomposition 44
– uracil complexes, thermal studies of 1053
Calcium aluminates, hydration of 1005
– carbonate, activation energy of 780
– -nickel EDTA chelates, multi-stage thermal decomposition of 1097
Calorimetric effusion cell, for measurement of vaporization heat 765
– method for determination of molar excess enthalpies 711
– study of calcium aluminates 1006
Calorimetry, use in thermokinetic determinations 179
Carbonates, dissociation mechanism of 139
Carboxylic acids, kinetics of thermal decomposition of 309
Cariflex IR-307, thermal curves of 97
Carnallite, thermal decomposition 571
Catalysts, oxidation of copper particles in 655
–, study by temperature-programmed desorption 801
Catalytic action of cobalt(II), as basis of thermometric determination 1397
Cephalosporins, DTA 1351
Cerium(IV) sulphate hydrates and deuterates, dehydration of 257
Chemisorption of oxygen species on nickel oxide 36
Chromium(III) oxide–ammonium sulfate mixture, reaction products 123
Chromium(IV) complexes of alkylaromatics, thermal decomposition 61
Citrates, heats of sublimation 903
–, thermal decomposition 895
Coal, TG–DTA–MS studies 147
Coating, fire-retardant, pyrolysis of 1107
Cobalt carbonate, thermal decomposition 581
Cobalt(II), determination by thermogravimetry 1397
– dithionate, thermal decomposition of 42
Cobalt(III) oxyhydroxide, isothermal kinetic data od 479
– –, TG 491
– –, thermal data of decomposition 497
Complex of pentachlorocuprate(II), thermal behaviour 639
Complexes, of cadmium(II) with uracil derivatives, thermal studies 1053
–, of trimellite-dianilic acid with amide solvents, TG, MTA 2,3
–, of vanillidene anthranilic acid, thermal decomposition 3
Copolymers, effect on thermal dechlorination of PVC 1017
Copper(I) sulphide–Copper(II) sulphate mixture, reaction of 971, 977
Copper(II) complexes, thermal decomposition 679
– dithionate, thermal decomposition 43

Copper(II)-doping, effect on electrical conductivity of lithium borate glasses 268
—, equiatomic compounds with rare earth metals with, transformations 667
— sulphate—copper(I) sulphide mixture, reaction of 971, 977
Copper particles, oxidation of in catalysts 655
Cross-linking, effect on thermal properties of vulcanizates 95
Crude oils, Iraqi, characterization with TG 1123
Crystal decomposition, triclinic, kinetic model of 941
— hydrates, dehydration/rehydration of surface layers of 755
Crystallization of aluminium sulphate, thermal study of 1083
— of glass, kinetic parameters for 118
— of glasses, in situ investigation 733
Curing of alkyd—allyl moulding compounds, study by DTA 997

Dehydration of cadmium(II) uracil derivatives 1056
— of cerium(IV) sulphate hydrates 257
— enthalpy, of zinc complexes of 6-amino-5-nitroso uracil derivatives 557
— of indigodisulphonates 520
— of magnesium EDTA chelate 1103
— of oxalic acid dihydrate, crystalline 1115
— /rehydration of surface layers of crystal hydrates 755
— of sodium cyclotriphosphate hexahydrate 943
— of tris(2,2'-bipyridyl) ruthenium(II) chloride 1001
Dehydroxylation of kaolinite-group minerals 1033
— — polytypes 919
Dental amalgams, identification of mercury-containing phases in, by DSC 131
Derivative thermogravimetry, of aluminium sulphate 1087
— —, of anthranilates 1320
— —, of aromatic-bis-neopentyl phosphonates 1239
— —, of asphalt—polymer systems 1010
— —, of cadmium(II) complexes with uracil derivatives 1056
— —, of cis-1,4-polyisoprene 97
— —, of cis-1,4-polybutadiene 907
— —, citric acid 898
— — curve, theoretical 1227
— —, of dithionates 42
— —, of double selenates 1344
— —, of hydrated aluminium oxide 954
— —, of indigodisulphonates 517
— — of magnesium carbonate 1080
— —, of metal citrates 899
— —, of neodymium zirconyl oxalate 400
— —, of oil sand fractions 1252
— —, of Plexauras 168
— —, of propellant compositions 1048
— —, of 1-phenyl-3-pyrazolidinone 934
— —, of salts of carboxylix acids 311
— —, of salycilates 796
— —, of scandium(III) benzoate derivatives 1301
— —, of tris(2,2'-bipyridyl) ruthenium(II) chloride 1003
— —, of tris(N,N-disubstituted dithiocarbamate) complexes 1153
— —, of tris(Piperidyldithiocarbamates) 281
— —, of vanillidene anthranilic acid complexes 4

Derivative thermogravimetry, of water desorption from silica gel 219
– –, of zinc complexes of 6-amino-5-nitroso uracil derivatives 555
Derivatograph, termo-gas-titrimetric unit of 333, 345
Desorption on catalysts, study by temperature-programmed desorption 801
– kinetic parameters, from temperature programmed desorption curves 1061
– of water from silica gel, thermal analysis of 217
Desorptogram of hydrogen on 15% Ni/SiO_2 1073
Dichloronitrobenzene, determination of the purity of 810
Dickites, DTA 923
Differential scanning calorimetry of alloys 1146
– – –, of aluminium sulphate 1089
– – –, of azodicarbonamide 77
– – –, of *p*-azoxyanisole 418
– – –, of cadmium(II) complexes with uracil derivatives 1057
– – –, of benzoylperoxide and mixtures 564
– – –, for determination of kinetic parameters 1139
– – –, equation for determination of reaction kinetic parameters from 115
– – –, height of phase transition peaks 405, 415
– – –, of hydroxypropylcellulose 419
– – –, identification of mercury containing phases in dental amalgams by 131
– – –, of indigodisulphonates 518
– – –, of lithium chloride water system 423
– – –, of liquid crystals 415
– – –, of magnesium oxalate dihydrate 90
– – –, of N-methylmorpholine N-oxide 412
– – –, of nickel–phosphorus alloys 706
– – –, of order–disorder transitions 433
– – –, of polytetrafluoroethylene film, rradiated 297
– – –, for purity determination 807
– – –, of silver(I) sulphide 435
– – –, of sodium nitrate 435
– – –, study of the polymerization of methacrylic acid esters 697
– – –, of vanadium sulphides 1221
– – –, of zinc complexes of 6-amino-5-nitroso uracil derivatives 556
Differential thermal analysis, of ammonium sulfate–metal oxide mixtures 123
– – –, of anthracite 148
– – –, of anthranilates 1320
– – –, of asphalt–polymer systems 1010
– – –, of bismuth molybdates reoxidation 307
– – –, of calcium aluminates 1007
– – –, of carnallite 574
– – –, of cephalosporins 1352
– – –, of chromium(IV) complexes with alkylaromatics 66
– – –, of cis-1,4-polybutadiene 907
– – –, of cis-1,4-polyisoprene 97
– – –, citric acid 898
– – –, of cobalt carbonate 584
– – –, of copper(II) complexes 683
– – –, of dickites 923
– – –, of double selenates 1344
– – –, effect of sample holder on the accuracy of 503
– – –, of electrically aged polyethylene 1260

Differential thermal analysis, equation for determination of reaction kinetic parameters from 115
– – –, of epoxy compositions 991
– – –, – resins 645
– – –, of equiatomic compounds of copper with rare earth metals 665
– – –, of $Fe_4V_2Mo_3O_{20}$ 985
– – –, of fungicides 317
– – –, of hydrated aluminium oxide 954
– – –, of iron(III) citrate pentahydrate 442
– – –, – oxide–ammonium sulfate mixtures 123
– – –, isothermal surface transmitter for 105
– – –, of kaolinite minerals, 921, 923, 928
– – –, of lithium potassium sulphate 329
– – –, manganese oxide–ammonium sulfate mixtures 123
– – –, measurement of heat capacity by 1369
– – –, of metal citrates 899
– – –, of mixture of copper(II) sulphate–copper(I) sulphide 972, 978
– – –, of moulding compounds 997
– – –, of neodymium zirconyl oxalate 400
– – –, of nickel(II) morpholine complexes 467
– – –, of oxalic acid dihydrate 1119
– – –, of pentachlorocuprate(II) complex 640
– – –, of 1-phenyl-3-pyrazolidinone 934
– – –, of Plexauras 168
– – –, of potassium persulfata 24
– – –, of propellant compositions 1048
– – –, of pyrite 13
– – –, quantitative, a novel approach to 105
– – –, – of reduction of uranyl fluoride 787
– – –, of reactions of triglycidyl isocyanurate with aniline 1281
– – –, of salts of carboxylic acids 311
– – –, of scandium(III) benzoate derivatives 1301
– – – of serpentinites 1314
– – –, study of crystallization of glasses by 736
– – –, of tertiary butylperoxybenzoate 544
– – –, of tris(2,2'-bipyridyl) ruthenium(II) chloride 1003
– – –, of tris(N,N-disubstituted dithiocarbamate) complexes 1153
– – –, of tris(piperidyldithiocarbamates) 281
– – –, two-point method for 504
– – –, of vanadium sulphides 1211
– – –, of water desorption from silica gel 219
Differential X-ray diffraction spectra of $Ca_3(PO_4)_2$–$CaNaPO_4$ system 445
Direct injection enthalpimetry, study of azo coupling reactions by 353
– thermometry, for determination of moisture in silicic acid 157
Dispersion of solid decomposition products 949
Dissociation mechanism of carbonates 139
Dissolution of manganese(II) hydroxyapatite in MnO–P_2O_5–H_2O system 1359
Dithionate compounds, thermal decomposition 41

Effect of ionizing radiations on hydrogen reduction of nickel oxide–cerium oxide mixtures 57
Elastomers, thermal stability of 905
–, – transitions of 906
–, of urethanes, thermomechanical analysis of 227

Electrical conductivity, temperature dependence of, of glasses 265
Electronic spectra of pentachlorocuprate complex 642
Enthalpimetry, for determination of nitro and nitroso compounds 153
–, direct injection, study of azo coupling reactions by 353
Enthalpy of decomposition reaction, of nickel(II) morpholine complexes 473
– of hydrogen ion transfer 815
– of reduction, of uranyl fluoride 791
– of vaporization, determination by an effusion cell 763
– – of liquids 769
Entropy of hydrogen transfer 815
Epoxy adhesives, thermal stability of 989
– compounds, cured with boron trifluoride complexes, thermal stability 985
– resins, kinetics of polymerization, effect of fibers on 645
Equations of state, excess enthalpy calculations by means of 687
Errors in determination of activation energy 1075
ESR-study of dehydroxylation of kaolinite-group minerals 1033
Ethylenebisdithiocarbamate fungicides, DTA 317
Evolved gas analysis, of potassium persulfate 24
– – –, thermogas-titrimetric unit for 333, 345
– – detection, with thermal decomposition of propellants 1046
Excess enthalpy, calculations by means of equation of state 687
– – of binary mixtures of pyridine bases + hexan-1-ol 173

Fire-retardant coating, pyrolysis of 1107
Fungicides, DTA 317

Gel effect, with polymerization of methacrylic acid 697
Genitron AC-2, thermal decomposition of 77
Glass fibres, crystallization, in situ study 733
– formation region of the Ag_2O–B_2O_3–P_2O_5 system 674
–, kinetic parameters for the crystallization of 118
– transition of atactic polystyrene by DSC 412
– – temperature of Ag_2O–B_2O_3–P_2O_5, by DSC 676
Glasses of lithium borate, electrical conductivity of 265
Gorgonia, thermal decomposition 167

Heat capacity, measurement by DSC 1369
– –, of polyoxymethylene, measurement of by DSC 1370
– of crystallization of nickel–phosphorus alloys 707
– of dehydration of crystal hydrates 760
– of formation of N–H . . . π bonded adducts 1171
– of fusion, of polytetrafluoroethylene, effect of irradiation on 299
– of mixing, prediction on the bases of equations of state 687
– of oxidation of copper particles in catalysts 655
– of sublimation, of metal citrates 903
Heating rate, effect on thermal decomposition of anilinium octamolybdate 1131
High frequency thermal analysis of potassium persulfate 22
– cooling rate, thermal analysis at 1287
Hydration of calcium aluminates 1005
Hydrogen ion transfer, enthalpy and entropy of 815
Hydroxypropylcallulose, DSC 419

Indigodisulphonates, thermal behaviour of 515
Infrared spectra of epoxy resins 646
– – of manganese(II) hydroxyapatite 1360
– – of Suprasil 160
– –, of thermal decomposition products of neodymium zirconyl oxalate 402
– –, – – – of propellants 1047
– study of benzene adsorption 748
Interferometric method for determination of thermal conductivity 719
Ion-solvent interaction in molten acetamide-electrolyte systems 731
Iron(III) oxide, adsorption of benzene on 747
– – –ammonium sulfate mixture, reaction products 123
– citrate pentahydrate, thermal decomposition 439
– vanadate–iron(III) molybdate system, phase equilibria of 983
Iron sulfidation, kinetics of 1028
Isomorphous mixtures of carbonates, dissociation mechanism 139
Isothermal decomposition of aniline 253
– – of azodicarbonamide 79
– pyrolysis of fire-retardant coating 1107
– surface transmitter for DTA instrument 105

Kaolinite-group minerals, dehydroxylation 1033
– polytypes, dehydroxylation of 919
Kinetic parameters, comparison of methods for determination of 959
– –, determination with the peak temperature method 1139
– –, of solid state reactions, measurement of 775
– –, of thermal decomposition of azodicarbonamide 84
– –, – –, of dithionates 47
– –, – –, of potassium persulfate 21
– –, – dehydration of magnesium oxalate dihydrate 91
– study of crystallization of glasses by optical method 740
Kinetics of azo coupling reaction, study by DIE 353
– of decomposition, of cobalt(III) oxyhydroxide 479
– –, of crystalline oxalic acid dihydrate 1118
– of dehydration of cerium(IV) sulphate hydrates, deuterates 262
– of hydrogen reduction of nickel oxide–cerium oxide mixtures 49
– of oxidation of copper particles in catalysts 655
– of polymerization of epoxy resins 645
– of pyrolysis of fire-retardant coating 1110
– of solid-state reactions, experimental approach to determination of 1013
– – –, remarks on 1225
– of thermal decomposition of anilinium octamolybdate 1131
– – –, of azodicarbonamide 80
– – –, of metal citrates 901
– – –, of 1-phenyl-3-pyroazilidinone 938
– – –, of salts of carboxylic acids 315
– – –, of solids 887
– – –, of vanillidene anthranilic acid complexes 3
– – –, of xylene-bis-neopentyl phosphonates 1237
– – dehydration of magnesium oxalate dihydrate 89
– – dissociation for multi-stage reactions 1095

Linear programmed thermal degradation mass spectrometry 237
Lithium borate glasses, temperature dependence of electrical conductivity 265

Lithium chloride–water, phase diagram of 423
– potassium sulphate, thermal anomaly of 325
Liquid crystals, transition peaks by DSC 415
Liquids, thermal explosion of, method for study 533
Low pressure autoclave for study of thermal runaway of liquids 534

Magnesium EDTA chelate, dehydration of 1103
– –manganese EDTA chelate, dehydration of 1103
– oxalate dihydrate, thermal dehydration 87
Manganese(II) carbonate, kinetics of thermal decomposition of 1232
– hydroxyapatite, dissolution of 1359
– –, thermodynamic quantities of 1367
– oxide–ammonium sulfate mixture, reaction products 123
Mass spectra of thermal decomposition products of copper(II) complexes 684
Mass spectrometric thermal analysis of trimellite–dianilic acid complexes 275
Mass spectrometry of volatile products of coal 150
Mathematical model of kinetics, thermal decomposition of solids 887
– – –, of tris(piperidyldithiocarbamates) 292
Mechanism of thermal decomposition of chromium(IV) complexes with alkylaromatics 72
Melting of carnallite 574
Mercury-containing phases, in dental amalgams, identification by DSC 131
Metal oxide–ammonium sulfate mixtures, reactions and thermal decomposition 121
Metastable diagrams in solid-solid equiiibria in $Ca_3(PO_4)_2$–$CaNaPO_4$ system 445
Methacrylic acid esters, study of the polymerization by DSC 697
Microcalorimetry for determination of oxidation of copper 655
– of benzene adsorption 745
– of sulfur dioxide–nickel oxide interaction 33
Microthermogravimetric apparatus for sulfidation of metals 1026
Microwaves, thermal analysis with 1269
Modelling of multiple reaction scheme 1327
Moisture, determination in silicic acid by direct thermometry 157
Molar excess enthalpies for mixtures of N,N-dialkylated aminoketones + *n*-heptane 711
Mössbauer study of thermal decomposition of iron(III) citrate pentahydrate 441
Multiple reaction scheme modelling 1327
Multi-stage thermal dissociation reactions, study of kinetics 1095
Mutually independent process, reaction scheme modelling of 1332

Neodymium zirconyl oxalate hexahydrate, thermal decomposition 399
Nickel(II) dithionate, thermal decomposition 43
– complex single crystals, mechanism and kinetics of 1013
– morpholine complexes, thermal behaviour 465
Nickel oxide–cerium oxide mixture, kinetics of hydrogen reduction 49
– oxide, interaction with sulfur dioxide 29
– –phosphorus alloys, chemically deposited, thermal behaviour of 701
Nitro and nitroso compounds, determination by enthalpimetry and catalytic thermometric titrimetry 153
N-methylmorpholine N-oxide, DSC 412
Non-linear temperature programme, for study of desorption 801

Oil sand fractions, thermogravimetry of 1247
Organic matter, determination in minerals by EGA 348
– materials, oxidation, study with thermal analysis 567

Oscillation in high resolution DTA of pyrite 14
Oxalic acid dihydrate, dehydration of 1115
Oxidation of copper particles in catalysts, kinetics 655
– of organic materials, study with thermal analysis 567
– of vanadium sulphides 1209

Parallel competitive processes, reaction scheme modelling of 1337
Peak temperature method, determination of kinetic parameters with 1139
Phase diagram of $FeVO_4$–$Fe_2(MoO_4)_3$ system 983
– –, of lithium chlorid–water non-equilibrium system 423
– –, of silverchalcogenide systems 523
– –, of solid-solid equilibria in $Ca_3(PO_4)_2$–$CaNaPO_4$ system 445
– equilibria of $FeVO_4$–$Fe_2(MoO_4)_3$ system 983
– transformation, crystallographic, of potassium chromate 597
– transition peaks, of DSC 405, 415
Phenidone, pyrolysis of 933
1-Phenyl-3-pyrazolidinone, pyrolysis 933
Polybutadiene, cis-1,4, thermal curves of 907
Polyethylenes, electrically aged, thermal analysis 1259
Polymerization kinetics of epoxy resins, effect of fibers on 645
– of methacrylic acid esters, study by DSC 697
Polymers, thermal degradation, study by means of volatilization curves 237
Polyoxymethylene, measurement of heat capacity of, by DSC 1370
Polytetrafluoroethylene film, effect of irradiation by electrons, DSC 298
Potassium chromate, thermal expansion of 597
– persulfate, thermal behaviour of 19
Propellant compositions, thermal decomposition of 1043
Purity, determination by DSC 807
PVC and copolymers, thermal dehydrochlorination and decomposition 1017
Pyridine bases + hexan-1-ol mixtures, excess enthalpies of 173
Pyrite, high resolution DTA 13
Pyrolysis of fire retardant coating 1107
– of 1-phenyl-3-pyrazolidinone 933

Quantitative DTA, a novel approach to 105

Rare earth lawsonates, thermal decomposition of 1393
– – metals, equiatomic compounds with copper, transformations 667
Reaction kinetic parameter, from variable temperature DSC or DTA 115
– scheme of decomposition of anilinium octamolybdate 595
Reduction of nickel oxide–cerium oxide mixtures, effect of radiation on 57
Reference materials, certification of 913
Rehydration of magnesium sulphate, effect of water pressure 759

Salycilates, thermal decomposition of 793
Sample holder, effect on the accuracy of DTA 503
Scandium(III) benzoate derivatives, thermal decomposition of 1299
Selenates, doubles, thermal decomposition of 1343
Serin–Ellickson equation, approximation to 367
Serpentinites, application of thermal analysis for identification and estimation of 1309
Silica gel surface, water desorption from 217
Silicic acid, determination of moisture in, by direct thermometry 157

Silverchalcogenide systems, phase diagrams 523
Single crystals of pentachlorocuprate(II) complex, thermal behaviour 639
Sodium cyclotriphosphate hexahydrate, dehydration of 943
Solid decomposition product, dispersion of and formation rate 949
– -solid equilibria, in $Ca_3(PO_4)_2$–$CaNaPO_4$ system 445
Solid-state reactions, activation of, errors in determination 1075
– – –, determination of activation energy of 243
– – –, kinetics of, remarks on 1225
– – –, mechanism and kinetics of 1013
Standardization in thermal analysis, certification of reference materials 913
Styrene-divinylbenzene, complete oxidation, study with thermal analysis 567
Sulfation of nickel oxide, influence of adsorbed oxygen on 29
Sulfidation of metals, thermobalance for study of 1025
Sulfur contents, determination in minerals by EGA 347
– dioxide, interaction with nickel oxide 29
Supercooling phenomena in acetamide-electrolyte systems 729
Suprasil, determination of moisture in, by direct thermometry 164

Temperature calibration for thermogravimetry 916
– -programmed desorption, on catalysts 801
– – – curves, deduced desorption kinetic parameters from 1061
– – –, of sulfur dioxide on nickel oxide 29
Thermal analysis of alkyd–allyl moulding compounds 995
– – as analytical method 1379
– – of gorgonia 167
– – at high cooling rates 1287
– – with microwaves 1269
– – of serpentinites 1309
– – for study of silica gel surface 217
– behaviour of chemically deposited nickel–phosphorus alloys 701
– –, of indigodisulphonates 515
– –, of pentachlorocuprate(II) complex 639
– –, of zinc complexes of 6-amino-5-nitrosouracil derivatices 553
– conductivity of lithium potassium sulphate 330
– – of solids, interferometric method for measurement of 719
– decomposition, of anilinium octamolybdate 589, 1131
– –, of anilinium octamolybdate dihydrate 251
– –, of anthranilates 1319
– –, of azodicarbonamide 77
– –, of benzoyl peroxide 561
– –, of calcium carbonate, activation energy of 783
– –, of carnallite 571
– –, of chromium(IV) complexes with alkylaromatics 61
– –, of citrates 895
– –, of cobalt carbonate 581
– –, of cobalt(III) oxyhydroxide 479, 491
– –, of dithionate compounds 41
– –, of double selenates 1343
– –, of hydrated aluminium oxide 953
– –, of iron(III) citrate pentahydrate 439
– –, kinetics, of vanillidine anthranilic acid complexes 3
– –, of neodymium zirconyl oxalate hexahydrate 399

Thermal analysis, of phenidone 933
– –, of propellant compositions 1043
– –, of rare earth lawsonates 1393
– –, of reaction products of ammonium sulfate–metal oxide mixtures 121
– –, of salts of carboxylic acids 309
– –, of scandium(III) benzoate derivatives 1299
– –, of solids 879
– –, of transition metal salycilates 793
– –, of tris 2,2′-bipyridyl ruthenium(II) chloride 1001
– –, of tris(N,N-disubstituted dithiocarbamate) complexes 1151
– –, of tris(piperidyldithiocarbamates) 279
– –, of xylene-bis-neopentyl phosphonates 1237
– dehydration of magnesium oxalate dihydrate 87
– dehydrochlorination of PVC and copolymers 1017
– dilatation of silicium, determination by interferometry 724
– expansion of lithium potassium sulphate 327
– –, of potassium chromate 597
– explosion of liquids, method for study 533
– hysteresis in transformation of equiatmoic compounds of copper with rare earth metals 669
– properties of cis-1,4-polyisoprene vulcanizates 95
– –, of copper(II) complexes 679
– oxidation of vanadium sulphides 1209
– resistance of sample holder, by DTA 503
– runaway of explosion of liquids 533
– stability of $Ag_2O–B_2O_3–P_2O_5$ system 673
– –, of elastomers 905
– –, of epoxy adhesives 989
– –, – compounds, cured with boron trifluoride complexes 965
Thermoanalytical equipment, characterization of 1385
Thermobalance for study of high-temperature sulfidation of metals 1025
Thermodilatometry, of kaolinite 928
–, of polyethylenes 1264
Thermodynamic data, of N–H . . . π hydrogen bonding 1171
– –, of uranyl fluoride 791
Thermoelectric properties of silverchalcogenide systems 528
Thermofractochromatography, of metal citrates 897
Thermogravimetry, of aluminium sulphate 1087
–, of aluminium octamolybdate 591
–, of ammonium sulfate–metal oxide mixtures 123
–, of anilinium octamolybdate dihydrate 253
–, of anthracite 148
–, of anthranilates 1320
–, of aromatic-bis-neopentyl phosphonates 1239
–, of cadmium(II) complexes with uracyl derivatives 1056
–, of carnallite 575
–, of cerium(IV) sulphate deuterates 261
–, – – hydrates 260
–, of chromium(IV) complexes with alkylaromatics 616
–, chromium(III) oxide–ammonium sulfate mixtures 123
–, of cis-1,4-polybutadiene 907
–, of cis-1,4-polyisoprene 97
–, citric acid 896

Thermogravimetry, of cobalt carbonate 584
–, of cobalt(III) oxyhydroxide 493
–, of copper(II) complexes 681
– curves, theoretical 1078, 1227
–, of dithionates 42
–, of double selenates 1344
– of electrically aged polyethylenes 1259
–, of epoxy compounds 968, 991
–, of hydrated aluminium oxide 954
–, of indigosulphonates 517
–, of Iraqi crude oils 1126
–, of iron(III) citrate pentahydrate 442
–. – oxide–ammonium sulfate mixtures 123
–, isothermal, of bismuth molybdate 301
–, of kaolinite minerals 921
–, of magnesium carbonate 1080
–, – oxalate dihydrate 90
–, metal citrates 899
–, of mixture of copper(II) sulphate–copper(I) sulphide 972, 978
–, of neodymium zirconyl oxalate 400
–, of nickel(II) morpholine complexes 467
–, of oil sand fractions 1249
–, of oxalic acid dihydrate 1119
–, of 1-phenyl-3-pyrazolidinone 934
–, of propellant composition 1048
–, under quasi-equilibrium conditions, for study of multi-stage reactions 1095
–, of salts of carboxylic acids 311
–, of salycilates 796
–, of scandium(III) benzoate derivatives 1301
–, of serpentinites 1314
–, temperature standards for 916
–, of trimellite-dianilic acid complexes 275
–, of tris(2,2′-bipyridyl) ruthenium(II) chloride 1003
–, of tris(N,N-disubstituted dithiocarbamate) complexes 1153
–, of tris(piperidyidithiocarbamates) 281
– of vanadium sulphides 1211
–, of vanillidene anthranilic acid complexes 4
–, of water desorption from silica gel 219
–, of zinc complexes of 6-amino-5-nitroso uracil derivatives 555
Thermokinetic determinations, use of calorimetry in 179
Thermomechanical analysis of urethane elastomers 227
Thermometric titrimetry, catalytic, for determination of nitro and nitroso compounds 153
Thermometry, for determination of cobalt(II) 1397
Topochemical reactions, localization phenomena of 941
– –, mechanism of 949
Transformation of chemically deposited nickel–phosphorus alloys 707
Transition metal salycilates, thermal decomposition 793
– temperature, by DSC 436
Tricalcium phosphate–calcium sodium phosphate, phase diagram of solid-solid equilibria 445
Triglycidyl isocyanurate, reaction with aniline and polyamines, DSC 1279
Trimellite-dianilic acid, complexes with amide solvents, TG, MTA 273
Tris(2,2′-bipyridyl) ruthenium(II) chloride, thermal decomposition 1001

Tris(N,N-disubstituted dithiocarbamate) complexes 1151
Tris(piperidyldithiocarbamates), thermal decomposition 279
Two-point DTA method 503

Uranyl fluoride, reduction, study by DTA 789
Urethane elastomers, thermomechanical analysis of 227

Vanadium sulphides, thermal oxidation 1209
Vanillidene anthranilic acid, complexes of, thermal decomposition 3
Vaporization of liquids, determination by an effusion cell 763
Vitreous phases of the Ag_2O–B_2O_3–P_2O_5 system 673
Volatilization curve, for study of thermal degradation of polymers 237
Vulcanizates, effect of network structure on thermal properties 95

Water film pressure, determination on silica gel surface 224

X-ray diffraction, high-temperature, study of crystallization of glasses by 737
– – analysis, of serpentinites 1311
– – –, of equiatomic compounds of copper with rare earth metals 667
– – data of anilinium octamolybdate 592
– – –, of $Ca_3(PO_4)_2$–$CaNaPO_4$ system 445
– – –, of hydrated aluminium oxide 956
– – –, of neodymium zirconate 402
– – –, of pentachlorocuprate(II) complex 642
Xylene-bis-neopentyl phosphonates, thermal decomposition kinetics 1237

Zinc complexes of 6-amino-5-nitroso uracil derivatives 553
Zinc(II) dithionate, thermal decomposition 44
